DETAILED ACTION

Allowable Subject Matter

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 16, and 17, patentability resides in "the control module communicates the electrical signal to an audible alarm if the sensor senses that the vehicle's gearshift lever has been moved from the first position to the second position, and wherein the system does not inhibit the vehicle from being driven.", in combination with the other limitations of the claim.

Regarding claim 21, patentability resides in "an audible alarm system for a television microwave truck having an extensible pneumatic mast, the system comprising: a control module, the control module receiving an electrical signal from the extensible pneumatic mast when the extensible pneumatic mast is fully or partially deployed and, wherein the control module communicates the electrical signal to an audible alarm if the sensor senses that the truck's gearshift lever has been moved from the first position to the second position.", in combination with the other limitations of the claim.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion.
